## SERIES 1400 <br> ROTATING CONTROL DEVICES <br> （＂SHORTY＂）

#### Abstract

The Washington Series 1400 ＂Shorty＂Control Device has become our most popular design and offers the same durability and dependability as the 1300 series，with one considerable advantage，a much lower profile．The 1400 Series can be used with or without Drive Bushings and because it is so compact has become a very versatile Rotating Control Device．The 1400 Series Control Device utilizes our 4010 stripper rubber and will seal off drill steel from $2 "-8 " 0 D$ ．The 1400 rotating assembly can also be used in a 1300 series bowl．
